More specifically, the GLO is set up:
- to bring together land data generation/monitoring initiatives and make them visible and usable;
- to document and strengthen analyses on the status-quo and trends with regards to land tenure and land rights/governance;
- to undertake policy research, feeding the development of specialized reports, knowledge exchange and high-level advocacy events on land tenure and land rights/governance;
- to provide evidence on relevance of responsible governance of tenure to promote food security, reduce inequality and enhance the sustainability of agri-food systems in the long term.

Indicators and methodologies
GLO combines core indicators, with complementary indicators and a toolbox of methodologies.

Data outcomes
- Awareness and visibility of land and land data on a global stage, documenting status and trends in land and land governance
- To upscale data centralisation and generation
- To data consolidation and legitimisation
- Increased uptake and impact of land data

Broader impacts
- Scale up and strengthen collaboration of land data and monitoring initiatives
- Elevate the land discourse and build awareness at the highest political level (including monitoring SDGs, VGGT, etc.)
- Scale up policy engagement with regards land tenure and governance
- Strengthening transparency and accountability

* Additional indicators related to SOLAW could be included. TBD based on recently published SOLAW report/indicators.

Products
Open access database and monitoring platform;
- A one-stop-platform providing the broader land community with sets of indicators;
- Methodologies and tools for broad-based land tenure and governance monitoring;
- State of Land Tenure and Governance (SLTG) report;
- Analysis & policy guidance documents on land related topics.

Alignments
Aligned to SDGs, VGGT and other global frameworks such as UNDRO, UNDRIP;
- Embedded in Global Land Agenda as Global Accountability framework;
- Potential custodian for CBD Global Biodiversity framework.

Who owns the world’s land
- Land inequality and concentration
- Trends in control and shareholdings in land
- Land, Gender and Youth
- Land and climate/biodiversity
- Land and human rights
